PROFILE

Software engineer with a BICT (Honours) from the University of Colombo. I build full-stack web applications, mostly with Next.js, Node.js and Laravel on MySQL or PostgreSQL, and I currently develop and maintain several live business websites for clients in Sri Lanka. Earlier I spent six months as an intern at Imara Software Solutions, working on ERPNext and MERN projects. My final-year research applied Q-learning to adaptive programming practice for undergraduate students. I am comfortable dealing with clients directly, follow Agile practice in my day-to-day work, and learn new tools quickly when a project needs them.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, PHP, Python, Java, C, Go, SQL
Frontend	React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion
Backend	Node.js, Express.js, Laravel, REST APIs, JWT authentication, Nodemailer/SMTP
Databases	MySQL, PostgreSQL, MongoDB, Prisma ORM, schema design and query optimisation
Machine learning	Reinforcement learning (Q-learning), adaptive sequencing, decision-making systems
Cloud & DevOps	AWS (EC2), Docker, Kubernetes, Linux, GitHub Actions, Hostinger Node.js hosting
Practices	Agile/Scrum, SDLC, Git/GitHub, JIRA, Postman, unit and integration testing, TDD
Design	Figma, Adobe XD, wireframing, responsive and user-centred design

PROFESSIONAL EXPERIENCE

Full-Stack Developer | **Atlatic Pvt Ltd** *Present*

- Design, build and maintain client websites, including Ceylon Tours and Tech Ceylon, using Next.js, TypeScript and Tailwind CSS.
- Built the tour pricing and booking cart for Ceylon Tours and the admin panels used to manage content on both sites.
- Set up production hosting, environment configuration and SMTP email on Hostinger's Node.js plan.
- Take requirements straight from the client, agree priorities, and ship changes in short iterations based on their feedback.

Full-Stack Developer Intern | **Imara Software Solutions** *6 months*

- Customised an ERP system on the Frappe/ERPNext framework and built client-facing features with the MERN stack.
- Gathered requirements with clients and team members, then built responsive interfaces that worked across browsers.
- Debugged and optimised existing code, improving system performance by up to 35%.
- Managed version control with Git and GitHub, following proper branching and collaboration practice.

RESEARCH PROJECT

ProgFlex Tutor | **Final-year research project, University of Colombo** *Final year*

AI-enhanced adaptive programming learning platform

- Built a platform that helps undergraduate students practise C programming. A Q-learning agent decides question difficulty and order from each learner's performance.
- Created the question bank, the evaluation engine and the system architecture behind adaptive difficulty.
- Completed and defended the project as the final-year capstone.

EDUCATION

Bachelor of Information and Communication Technology (Honours) *2021 – 2026*
University of Colombo, Sri Lanka. Completed.

Advanced Networking Certification (CCNAv7) *2021*
SLIIT, Sri Lanka. OSI model, routing protocols and network security.

CERTIFICATIONS

Full-Stack Web Development (MERN Stack) • Responsive Web Design • RESTful API Development • Agile Project Management • Cloud Architecture Basics (AWS)

LANGUAGES

English, Tamil and Sinhala (fluent in all three)
